DISTRIBUTION OF NATIVE POPULATION IN ONTARIO BY CENSUS, 1981

PREFACE

Distribution of Native Population in Ontario by Census Areas, 1981, has been compiled for the Native Community Branch, Ontario Ministry of Citizenship and Culture, by the Research Office of the Ministry's Multicultural Program.

A major purpose of this volume is to provide the most recent census information about the patterns of residential settlement of Ontario's Native population. The information provided in this publication is expected to be helpful to Native organizations, government, community organizations, post-secondary institutions, and the public generally.

The tables are drawn from the ethnic origin data of the 1981 Census of Canada and constitute initial tabulations of the four categories of Native Peoples--Status Indian, Non-Status Indian, Metis and Inuit--by sex for the Province and Census Divisions, and by age and sex for urban areas. The information included was taken directly from printouts provided from Statistics Canada and obtained for the ministry by the Statistical Services Branch, Office of Economic Policy, Ministry of Treasury and Economics. More detailed tabulations will be available at a later time.

The production of this volume was guided by the staff of the Native Community Branch. The compilations were carried out by Elizabeth Parker under the general supervision of Maryelle Tetreault, Assistant Research Officer, and Dorene E. Jacobs, Research Officer, Multiculturalism and Citizenship Division, Ministry of Citizenship and Culture.

Additional copies may be obtained from the Ontario Government Bookstore, located at 880 Bay Street, Toronto for personal shopping. Out-of-town customers can write to Publications Services, 5th Floor, 880 Bay Street, Toronto, Ontario M7A 1N8. In Metro Toronto, call 965-6015. Outside Metro, dial 1-800-268-7540, toll free. In area code 705, call the operator and ask for Zenith 67200.

Further census information about Ontario's Native Population is available from:

PART I

STATISTICS CANADA DEFINITIONS

CENSUS AGGLOMERATION (CA)

Refers to the main labour market area of an urbanized core (or continuously built-up area) having between 10,000 and 99,999 population. CAs are created by Statistics Canada and are usually known by the name of the urban area forming their urbanized core. They contain whole municipalities (or census subdivisions). CAs are comprised of (1) municipalities completely or partly inside the urbanized core; and (2) other municipalities if (a) at least 40% of the employed labour force living in the municipality works in the urbanized core, or (b) at least 25% of the employed labour force working in the municipality lives in the urbanized core.

Since a CA must contain whole census subdivisions, its limits may fall within, or extend beyond, the actual labour market area. The differences may be significant in those parts of Canada where census subdivisions cover particuarly large areas of land.

CENSUS DIVISION (CD)

General term applying to counties, regional districts, and regional municipalities. There are 53 Census Divisions in Ontario.

CENSUS METROPOLITAN AREA (CMA)

Refers to the main labour market area of an urbanized core (or continuously built-up area) having 100,000 or more population. CMAs are created by Statistics Canada and are usually known by the name of the urban area forming their urbanized core. They contain whole municipalities (or census subdivisions). CMAs are comprised of (1) municipalities completely or partly inside the urbanized core; and (2) other municipalities if (a) at least 40% of the employed labour force living in the municipality works in the urbanized core; or (b) at least 25% of the employed labour force working in the municipality lives in the urbanized core.

Since a CMA must contain whole census subdivisions, its limits may fall within, or extend beyond, the actual labour market area. The differences may be significant in those parts of Canada where census subdivisions cover particularly large areas of land. Census metropolitan areas may also differ from Metropolitan Areas designated by local authorities for planning or other purposes.

Continued

ETHNIC ORIGIN

Refers to the ethnic or cultural group to which the respondent or the respondent's ancestors belonged on first coming to this continent. For Native Peoples, the phrase "on first coming to this continent" in the question was to be ignored by the respondent.

The census question enabled Native respondents to indicate whether they were Inuit, Status or Registered Indian, Non-Status Indian or Metis.

The 1981 Census is the first to accept more than one ethnic origin for an individual. Therefore, the summary tables include counts of single and multiple origins. It should be noted that in earlier censuses, only the respondent's paternal ancestry was to be reported, theoretically resulting in one ethnic origin per respondent. For 1981, this restriction has been removed and a person may now have more than one ethnic origin. Not all available multiple ethnic origins have been published. The unpublished data will be available upon special request, from Statistics Canada, subject to confidentiality constraints.

According to a Statistics Canada briefing document, "the 1981 Census ethnicity question solicits the reporting of ethnicity as perceived by the respondent. Therefore, the reporting of ethnicity for Native Peoples is a measure of that population's own perception of their identity."[1]

Ethnic Origin Data are usually based on the 20% sample and exclude the inmate population (residents of an "institutional" collective dwelling, other than staff members and their families). However, "The ethnicity question, from which the Native Peoples information was derived, was collected on a one-fifth sample basis in private households and weighted in populated areas but was collected on a 100% basis in more remote areas and most collective dwellings. The sampling and weighting methods used should have no negative effect upon the estimates."[2]

Note: in the tables, -- indicates less than 5 according to Statistics Canada random rounding procedures.
